SoundThinking-Introducing PlateRanger-Webinar-16x9

Hello Eligio,

We are excited to invite you to our upcoming webinar introducing PlateRanger™, powered by Rekor®. As the latest innovation from SoundThinking (formerly ShotSpotter™), PlateRanger is set to revolutionize the industry with its cutting-edge license plate recognition (LPR) and Advanced Vehicle Recognition technology.

In this webinar, you'll learn how PlateRanger leverages the power of artificial intelligence and machine learning to deliver unmatched accuracy and efficiency to provide:

- Detailed vehicle insights: make, model, color, vehicle type, class and category, direction of travel, plate number, and state of origin.
- Seamless integration: works with solutions like ShotSpotter, adding visual data to auditory gunshot detections for comprehensive investigations.
- Enhanced public safety: improves the quality and scope of vehicle data available to investigators.

Date: Tuesday, August 13th, 2024
Time: 10:00am-11:00am Pacific
Duration: 60 minutes + Q&A

Registration Details: Register Here

Speakers:

David Tawadras, Senior Director of Product at SoundThinking
David has dedicated the last seven years to advancing the public safety industry, creating and implementing cutting-edge technologies that aid the largest law enforcement agencies across the United States. With over a decade of experience leading technology companies, David now serves as Senior Director of Product at SoundThinking. His technological expertise and understanding of public safety requirements drive his commitment to innovation and maintaining the highest standards of safety and efficiency.

Giovanni Lepore, Director of Product Management, Public Safety Group at Rekor
A seasoned Product Manager currently spearheading the product vision for Rekor's Public Safety Group (PSG). Possessing over two decades of industry experience, Gio has a distinguished career in product lifecycle management. His expertise in strategic product development and targeted marketing has consistently driven brand identity. Recently, Gio made significant contributions to SIONYX by revolutionizing the 50-year-old analog night vision market with a digital ultra-low-light CMOS image

sensors product offering. Prior to this, he held pivotal roles at Teledyne FLIR and Extech Instruments, where he expanded his knowledge in thermal imaging, surveillance, thermography, and electrical testing.
